From the Author

- 1 Introduction: What, Why and How
- 2 A Typical Organization vs. a Service-Oriented Enterprise
 - 2.1 Where We Are Now?
 - 2.2 Where are we going?
- 3 The Business Model Decomposed
 - 3.1 About the Business Model
 - 3.2 Structural Elements of the Business Model
 - 3.3 Business Service Structure
 - 3.4 Business Process Structure
- 4 Service Orientation Promotes Business Innovation
 - 4.1 Perfection of the Part vs. Perfection of the Whole
 - 4.1.1 Isolated Programme Management
 - 4.1.2 How Business Flexibility Affects Business Efficiency
 - 4.1.3 Keeping Integrity and Authority Closer Together
 - 4.2 Business Values of Service Orientation
 - 4.3 Business Strategic Planning and Technology
 - 4.3.1 Strategic Planning for Technical Instruments
 - 4.3.2 Funding Service-Oriented Initiatives
 - 4.3.2.2 ROI for Service Usage Scenarios
 - 4.3.3. Culture of Project and Change Management in the SO environment
 - 4.4 Service-Oriented Business Organisation
- 5 Business Applications
 - 5.1 The Business Application in IT

5.2 The Business Application in Business

6 About IT Architecture

6.1 Trade-off between Theory and Reality

6.2 Recognised Architectural Types

6.2.1 Object-Oriented Architectural Type

6.2.2 Event-Driven Architectural Type

6.2.3 Process-Driven Architectural Type

6.2.4 Model-Driven Architectural Type

6.2.5 Service-Oriented Architectural Type

7 Technicalities of the Service Orientation Concept

7.1 Why SOA is Needed Now

7.2 Einstein's Secret

7.3 What does SOA mean today?

7.4 SOA Service and Service Attributes

7.4.1 Service Description

7.4.2 Service Contract

7.4.3 Service Level Agreement

7.4.4 Service Attributes Working Together

7.4.5 Service Granularity

7.5 Service-based vs. Service-enabled Design

8 Service-Oriented Business Architecture

8.1 What is SOBA?

8.2 Gaps in SOBA

8.2.1 Separation between Business and Technology

8.2.2 Technology Downsides in SO Solutions

8.3 Service-Oriented Business Application

8.3.1 Constructing Autonomic Business Service

8.3.2 Constructing an SO Business Application

8.3.2.1 Collaboration: Choreography or Orchestration

8.3.2.2 Business Service Reuse in the SO Business Applications

- 9 An Enterprise View on SOA Governance
 - 9.1 Standards-based Governance Basics
 - 9.2 SO Governance and Ownership
 - 9.3 SO Governance Concerns in IT
 - 9.3.1 Governance of Service Structure
 - 9.3.1.1 SOA Service Versioning
 - 9.3.1.2 IT Operational Challenges in SOE
 - 9.3.2 Governance of SO Infrastructure
 - 9.3.3 Governance of Service Inventory
 - 9.3.4 Governance of Participant Interactions In SOA
 - 9.3 SO Governance Policy Examples
- 10 Enterprise Architecture in SOE
 - 10.1 Enterprise Architectural Framework in SOE
 - 10.1.1 Representation of SOA Service in TOGAF
 - 10.1.2 Does SOA fit into old TOGAF ADM?
 - 10.1.3 What TOGAF Finds in Service Contract and What Doesn't
 - 10.2 Organisation Maturity for Service Orientation
- 11 Modelling and Managing Service-Oriented Solutions
 - 11.1 Modelling Services
 - 11.2 Modelling Data for Services
 - 11.3 Managing SO Testing
 - 11.4 Observing SOMA Updates
- 12 Service Orientation in IT Culture
 - 12.1 Do You Know What I Mean?
 - 12.2 Managing SO Products in IT Operations
 - 12.3 UIL in SOE
 - 12.3.1 Service Strategy
 - 12.3.2 Service Design
 - 12.3.3 Service Asset and Configuration Management
 - 12.3.4. Service Operation and Continual Improvement
- 13 Transition to SOE

- 13.1 Positioning SOA in SOE
- 13.2 Linking SO Architecture with Design for Business Domains
 - 13.2.1 A Gap between SOA and DDD
 - 13.2.2 DOSOM¹ Concerns
 - 13.2.2.1 Domain Analysis and Service in DOSOM²
 - 13.2.2.2 Service Execution Context in DDD
 - 13.2.2.3 Security, DDD, and SOA
 - 13.2.2.4 Fat Services and Flexibility
- 13.3 Ladder Steps

14 Conclusions and Take-away Recommendations

Glossary
